

Proposal for Carrie McCormick

Your Unfair Operating System — Built Around Your List

Carrie,

You sent us your list — every place the business lives on your phone, in your memory, or in your inbox. We took it seriously. This revised proposal is built directly from **your own words** — every system below traces back to something you asked for.

The shape hasn't changed, because it's the right shape for how you buy: **start with the one thing you've already seen work — ListingStory — let it earn its keep, then expand only as each piece proves itself.** What has changed is the scope. Your list is bigger than the original three modules, so the partnership is bigger too — and priced for the work it actually takes two senior operators to build and run.

One easy yes today. A clear, honest path to a deep partnership when you're ready — at a price that, by design, is recovered by a single listing.

Your List → What We'd Build

What You Told Us Hurts

- Calls & texts living on your phone, never recapped
- No system telling you who to follow up with, and when

What Bogen.ai Builds For It

- A Call & Text Concierge that captures, transcribes & recaps daily
- A Follow-Up Engine that surfaces the right name at the right time

- Milestones (births, moves, job changes, divorces) you'd act on — if you knew
- Staying visible on social without it feeling generic
- Intake that should auto-write the feature sheet
- A real newsletter, in your voice, on a reliable cadence
- Buyer wish-lists that should auto-match new listings

- A Lead Intelligence Engine watching for life-event signals
- A Social Presence Engine posting & engaging in your voice
- ListingStory — already live, already writing your listing copy
- A Newsletter Engine drafting & sending through your Mailerlite
- Buyer↔listing matching off your MLS / Zenlist data

Your current stack stays — we integrate, we don't replace. **Monday.com** and **Mailerlite** connect directly; your **MLS / Zenlist** data feeds the buyer-matching; your **YouTube, LinkedIn, Instagram and Facebook** are where the Social Presence Engine works.

THE MATH — WHY THIS PAYS FOR ITSELF

At your price point, a single luxury listing side on a \$2.5M home is roughly **\$60,000 in commission**. You don't need a productivity statistic to justify this — you need **one listing**.

One seller who chooses you because the ListingStory experience felt more bespoke than the agent across the table. One call the Concierge catches that would otherwise have gone cold. One past client the Follow-Up Engine resurfaces before they list with someone else. One buyer matched to a listing the morning it hits. **Any one of those, once, pays for the entire program for the better part of a year.**

You're paying JotForm roughly **\$100/month for a form that does nothing but collect answers**. The systems below replace it, write your copy, catch your leads, and feed each other — for a fraction of what the equivalent team of vendors and hires would cost.

WHAT THIS COSTS EVERYWHERE ELSE

Bought piecemeal, the systems on your list run at market: a fractional AI officer is **\$5,000–\$15,000/mo**, luxury social management **\$3,000–\$7,000/mo**, an ISA / call-response service **\$900–\$1,500/mo**, CRM management **\$500–\$1,500/mo**, a done-for-you newsletter **\$200–\$2,500/mo**, and life-event lead data **\$200–\$500/mo** — before the one-time custom build of **\$15,000–\$50,000**. The full-time alternative — one operations hire — runs **\$270,000–\$400,000/year** loaded, and adds the very headcount your brand is built on not having.

Two senior operators who **build it all and run it all** sits at **\$12,000–\$22,000/month** on the open market. The path below is priced at or below that — and you never start at the top. You grow into it as each stage earns the next.

The Path: Three Stages, One Easy First Step

This is not a "pick a tier and write a big check" proposal. It's a **journey you control**. You begin with ListingStory — already built, already yours. Each stage earns the next. You never pay for the next layer until the last one has proven itself in your business.

START HERE

STAGE 1 · NOW

ListingStory

\$1,250/mo

+ \$1,500 build (credited to annual)

- ✓ Your live, branded seller-intake app
- ✓ AI Property Story on every submission — MLS remarks + IG caption in your voice
- ✓ Submissions dashboard + a real database
- ✓ Hosting, updates, support — zero tech burden

The wedge. The thing you've already seen working. Live in your listings within days.

STAGE 2 · MONTHS 2-6

The Operating Core

\$4,500/mo

+ \$4,500 build (credited to annual)

- ✓ **Call & Text Concierge** — captured, transcribed, daily digest
- ✓ **Follow-Up Engine** — who to follow up with, and when
- ✓ **Newsletter Engine** — your voice, your Mailerlite, reliable cadence

The relief layer — gets the business off your phone. Modules added one at a time, as each earns its place.

STAGE 3 · MONTH 6+

Growth + Partnership

\$12,000/mo

Founding-Client rate — locked 12 months (list rate \$15,000)

- ✓ **Lead Intelligence Engine** — life-event signals + buyer↔listing matching
- ✓ All Stage 1 & 2 systems, run end-to-end
- ✓ Bi-weekly strategy with Edmund + Eytan on call
- ✓ Monthly performance reporting

The offense layer. Two senior operators for less than one ops hire — without breaking your promise.

Social Presence Engine — optional add-on

+ \$4,000/mo

Consistent, on-brand posting and engagement across YouTube, LinkedIn, Instagram and Facebook — drafted in your voice, never generic. Priced and scoped separately on purpose: it's the most hands-on, highest-touch piece, so it carries its own defined scope (set number of posts per month and capped revision rounds) rather than being buried in a bundle. Add it at any stage.

You're never locked into the path. | Start at Stage 1. Move to Stage 2 only when ListingStory has proven itself. Reach Stage 3 only when the systems are carrying real weight. | **Each stage is month-to-month after**

a 3-month start; the annual plan saves 10% and credits the build fees. Your Founding-Client rate on Stage 3 is locked for 12 months.

The Systems — In Your Words

Every module below is something you named. Here's what each one does.

ListingStory · Stage 1 — already live

"A client intake form that auto-generates a polished feature sheet / listing copy."

Your branded seller-intake app. The moment a seller submits, Claude drafts the Property Story — MLS remarks plus an Instagram caption, in your voice and Fair-Housing compliant. Every submission feeds your dashboard and the database the rest of the stack is built on.

Call & Text Concierge · Stage 2

"Need inbound calls and texts automatically captured, transcribed, and recapped into a daily digest instead of living on my phone."

Inbound calls and texts are captured, transcribed, and rolled into one daily digest you actually read — so nothing lives on your phone and nothing slips because you were showing a property when it came in.

Follow-Up Engine · Stage 2

"A system that proactively tells me who to follow up with and when, based on last contact and deal stage."

A proactive engine that surfaces the right name at the right moment — ranked by last contact and deal stage — and drafts the outreach in your voice.

Newsletter Engine · Stage 2

"A recurring newsletter program... market updates, neighborhood spotlights, just-listed/just-sold... drafted in my voice and sent on a reliable cadence."

Market updates, neighborhood spotlights, and just-listed / just-sold features drafted in your voice on a dependable schedule — sent through your existing Mailerlite, so your list and your sending reputation stay yours.

Lead Intelligence Engine · Stage 3

"Connect CRM + social to surface life events... a way to identify divorce or any life-changing moments... match the buyers with properties that come on the market."

Two jobs, one data layer. **Life-event monitoring** watches connected sources for the moments that move people — births, marriages, graduations, job changes, and other life events — so you can reach out at the right time. **Buyer↔listing matching** takes each buyer's wish-list and matches it against new and pre-market listings from your MLS / Zenlist data, ranking the fits and drafting the outreach.

Important — please read. Some life-event signals (for example, certain divorce or probate filings) may be available as public record. Bogen.ai is **not a law firm and does not provide legal advice.** While such records are generally public, you and your brokerage are **solely responsible for independently confirming the legality and compliance** of any public-records-based outreach under Illinois and federal law — including Fair Housing, advertising, and anti-solicitation rules — with your own counsel before any such outreach is used. You review and approve all outreach in advance; Bogen.ai builds the tool, you decide how and whether it is used. **Buyer↔listing matching also depends on your MLS / Zenlist data-license terms, which your managing broker must confirm.**

Social Presence Engine · optional add-on

"Help me post, comment, and stay visible consistently without it feeling generic."

Consistent posting and engagement across YouTube, LinkedIn, Instagram and Facebook, drafted in your voice.

NOT A MOCKUP — IT'S LIVE RIGHT NOW

See ListingStory in your colors

We built this for you the night of our first meeting. Open it on your phone, fill it out as if you were one of your sellers, and watch it write the listing story. This is the difference between a consultant who pitches and a partner who builds.

The Seller Form

Why Bogen.ai

Edmund Bogen — Founder

Keynote speaker, author of Prompt to Close, and founder of Edmund's Mastermind — a 14,000-member community of realtors and entrepreneurs adopting AI at scale. Edmund's own background is South Florida luxury real estate: the same relationship-driven, white-glove, detail-obsessed business you run. He speaks your language because it's his language. On this engagement Edmund holds strategy, the relationship, and advisory.

Eytan Benzeno — Partner & AI Engineer

Eytan is the technical force behind Bogen.ai's builds — custom apps, AI models, automations, and integrations. **Eytan builds; Edmund advises.** With this partnership you get a dedicated senior AI engineer, not a queue ticket.

Our Approach

Everything we build wears your brand and feeds your database. We're not a software vendor and we're not an agency that bills by the hour. We're two operators who build the tools, then

run them with you. Because it's two of us, we take on a limited number of full-partnership clients at a time — which is part of why we'd build yours right.

How We Compare

You have three other ways to solve this. Here's the honest read:

Keep stacking off-the-shelf SaaS (JotForm, a CRM, an email tool, an answering service, a social scheduler)

Cheap per tool, but none of them talk to each other, none of them wear your brand, and none of them write a listing story or a follow-up in your voice. You become the integration layer — which means it still all runs through you. That's the exact ceiling we're removing.

Hire an operations / marketing person

\$270,000–\$400,000 a year fully loaded for a full-time hire — or \$5,000–\$15,000/mo for a fractional one — months to recruit and ramp, and it quietly breaks your promise. "When you hire Carrie, you get Carrie" stops being true the moment a seller is really dealing with your assistant. Systems scale you without diluting you.

A custom dev shop or AI agency

A custom intake app alone runs \$15,000–\$50,000 to build, before anyone maintains it — and they hand you software and walk away. We've already built yours, we run it for you, and we know real estate. You're not buying code; you're buying a partner who ships.

Bogen.ai is built for the solo principal who needs to scale herself without hiring a team or becoming an IT department. The same two people write the strategy and do the build. You start small, you see it work, and you grow it on your terms.

Risk, Guarantee & Compliance

30-Day Money-Back Start

Run ListingStory for 30 days. If it isn't the most useful tool in your listing process and you don't want to continue, we refund the build fee in full. You risk nothing to find out.

You Own Everything

Your brand, your data, your client relationships, and the systems we build for you remain yours. Seller and client data is treated as confidential. You're never locked into proprietary software you can't leave.

Earn-the-Next-Stage Discipline

You only advance to Stage 2 or Stage 3 when the prior stage has proven its value in your business. We'd rather grow this slowly and keep you for years than oversell it once.

Defined Scope & Service Levels

Each managed service runs to a written service level — concierge response windows, newsletter sends per month, and (for the Social Presence add-on) a set number of posts and capped revision rounds — so "done-for-you" always means a clear, agreed scope for both of us.

Fair Housing & Content Approval

Every AI-generated listing story, follow-up, post, and outreach is written to be Fair-Housing compliant, and you approve all copy before it's ever published or sent. The AI drafts; you decide.

Not Legal Advice

Bogen.ai is not a law firm and provides no legal advice. Any feature touching public records or life-event data — including divorce, probate, or similar filings — is provided as a tool only. You and your brokerage are solely responsible for confirming, with your own counsel, that any such use is lawful and compliant under Illinois and federal law before it is used. We will build to whatever guardrails you and your counsel set.

Next Steps

1. **Send your available dates.** We'll walk through this revised proposal together, line by line, on our next call.
2. **Say go on Stage 1.** We point ListingStory at your live listings, your email, and your Drive, and lock your exact intake fields.
3. **Go live within days.** You start sending the form to real sellers. We're on call for tweaks.
4. **Stage 2 and 3 when you're ready.** Once each stage has earned it, we scope the next — one module at a time, on your go-ahead.

Case Study Partnership

When this works — and it will — we'd like to tell the story. With your written approval, Bogen.ai may reference you by name and document this engagement (a short video, post, or keynote case study) to show other top agents what's possible. You approve any metrics shared, and you can revoke named use at any time.

- ✓ You become the flagship example of the luxury-agent AI operating system
- ✓ All named use of "Carrie McCormick" remains subject to your written approval

Terms

This Proposal Supersedes

This revised agreement (June 9, 2026) replaces and supersedes all prior proposals, including those of May 30 and June 4, 2026, in their entirety.

Ownership & License

ListingStory and all systems we build are Bogen.ai intellectual property, licensed to you on a perpetual, non-exclusive, royalty-free basis for your use while engaged. Your brand, your seller and client data, and your client relationships remain entirely yours.

Term & Founding Rate

Each stage begins with a 3-month minimum, then continues month-to-month (30-day notice). The annual plan saves 10% and credits the build fees; once a build is delivered, the annual prepayment for that build is non-refundable. The Stage 3 Founding-Client rate of \$12,000/mo is locked for 12 months from the start of Stage 3.

Pass-Through Costs

Third-party costs that scale with your usage — telephony for the Call & Text Concierge, public-records or lead-data subscriptions, and AI API usage — are billed at cost, itemized, in addition to the retainer. We disclose these before any module that incurs them goes live.

Content Approval & Compliance

You and your brokerage review and approve all AI-generated copy and outreach before publication or send; published material remains subject to your brokerage's advertising, MLS, and Fair Housing requirements. Seller and client data is treated as confidential and deleted on request.
