

Proposal for Carrie McCormick

Your Unfair Operating System — Starting with ListingStory

Carrie,

In twenty-five years you've sold over \$3.5 billion in Chicago real estate and built the city's #1 individual luxury practice — Gold Coast, Lincoln Park, Streeterville, the North Shore — on a promise no team can copy: "When you hire Carrie, you get Carrie." That promise is your moat. It is also your ceiling. Every listing, every seller, every story runs through one person — you.

That's exactly what we talked about in Chicago on June 3rd. You don't need more staff — staff breaks the promise. You need **systems that clone the parts of you that don't require you**: the intake, the listing copy, the follow-up, the database, the phone. So after our meeting, Eytan and I didn't write you a deck. We went home and **built your form**. By that night, **ListingStory was live** — a working app, branded in your colors, carrying your line: "Every home has a story and I bring it to life."

This proposal is built the way we think you actually buy: **start with the one thing you've already touched and seen work**. Put ListingStory into your listings. Let it earn its keep. Then — only then — we expand it into the voicemail operator, the database, and the newsletter engine you asked about. One easy yes today. A clear path to a much deeper partnership when you're ready.

The Opportunity

Today

- The business runs on one person's time, memory, and phone
- Seller intake on JotForm — a generic form that captures data and stops there
- Listing descriptions written by hand, listing by listing
- Twenty years of past clients scattered across inboxes, contacts, and memory
- Inbound calls and leads caught only when you're free to catch them

With Bogen.ai

- Systems that carry the routine so you stay on the high-value work
- A branded intake that writes the listing story the moment a seller submits
- MLS copy + social captions drafted in your voice, every time
- One living database — every seller, every property, every past client
- An AI operator that answers, qualifies, and never lets a lead slip

THE MATH — WHY THIS PAYS FOR ITSELF

At your price point, a single luxury listing side on a \$2.5M home is roughly **\$60,000 in commission**. You don't need a productivity statistic to justify this — you need **one listing**.

One seller who chooses you because the ListingStory experience felt more bespoke than the agent across the table. One call the AI operator catches at 9pm that would otherwise have gone to voicemail and gone cold. One past client the database resurfaces before they list with someone else. **Any one of those, once, pays for the entire program for a year.**

You're paying JotForm roughly **\$100/month for a form that does nothing but collect answers**. ListingStory replaces it, writes your listing copy, and feeds every other system — for a fraction of one deal. The downside is capped at a few hundred dollars a month. The upside is measured in listings.

THE FULL PICTURE — WHERE THIS GOES

At maturity, Bogen.ai becomes your outsourced AI operations team: ListingStory, an AI voicemail operator, your full client database, and an automated newsletter engine — all built, run, and optimized by Edmund and Eytan, with you advised at the table. A fully managed operating system of this scope runs **\$6,000–\$10,000/month (roughly \$75K–\$120K/year)** — and still costs less than the single operations hire that would quietly break "when you hire Carrie, you get Carrie."

You don't start there. You start with one tool, for a fraction of that — and grow into the partnership only as each piece earns it. Here's the path.

The Path: Three Stages, One Easy First Step

This is not a "pick a tier and write a big check" proposal. It's a **journey you control**. You begin with ListingStory — already built, already yours. Each stage earns the next. You never pay for the next layer until the last one has proven itself in your business.

START HERE

STAGE 1 · NOW

ListingStory

\$1,250/mo

+ \$1,500 build (credited to annual)

- ✓ Your live, branded seller-intake app
- ✓ AI Property Story on every submission — MLS remarks + IG caption in your voice
- ✓ Submissions dashboard + a real database
- ✓ Hosting, updates, support — zero tech burden

The wedge. The thing you've already seen working. Live in your listings within days.

STAGE 2 · MONTHS 2-6

Build the Stack

\$2-4K/mo

added as each module goes live

- ✓ **AI Voicemail Operator** — answers, qualifies, never misses a lead
- ✓ **Database / CRM** — your 20-year sphere in one place
- ✓ **Newsletter Engine** — your stories become listing emails automatically

Each module runs on the same data ListingStory is already collecting. Add them one at a time, as each earns its place.

STAGE 3 · MONTH 6+

Full Partnership

\$6-10K/mo

Edmund + Eytan, retained

- ✓ We operate all four systems end-to-end — built, run, optimized
- ✓ Bi-weekly strategy sessions with Edmund — growth, brand, your next chapter
- ✓ Eytan on call — priority build queue + ongoing automation
- ✓ Monthly performance reporting

Two senior operators for less than the cost of one ops hire — without breaking "when you hire Carrie, you get Carrie."

You're never locked into the path. | Start at Stage 1. Move to Stage 2 only when ListingStory has proven itself. Reach Stage 3 only when the systems are carrying real weight. | **Month-to-month after a 3-month start; annual plan saves 10% and credits the build fee.**

What's Included in ListingStory (Stage 1)

- ✓ Custom-branded seller intake form — your brand, your domain, **unlimited submissions** (no JotForm caps)
- ✓ AI **Property Story** on every submission: MLS listing remarks + Instagram caption, written in your voice and Fair-Housing compliant
- ✓ Submissions dashboard — every seller and property in one organized view
- ✓ A real database that becomes the foundation for everything in Stage 2
- ✓ Instant email to you + mirror to a Google Sheet / Drive of your choosing
- ✓ Multiple property templates (condo, single-family, new construction) as we roll them out
- ✓ Hosting, maintenance, updates, and ongoing tweaks — fully done-for-you

NOT A MOCKUP — IT'S LIVE RIGHT NOW

See ListingStory in your colors

We built this for you the night of our meeting. Open it on your phone, fill it out as if you were one of your sellers, and watch it write the listing story. This is the difference between a consultant who pitches and a partner who builds.

Why Bogen.ai

Edmund Bogen — Founder

Keynote speaker, author of Prompt to Close, and founder of Edmund's Mastermind — a 14,000-member community of realtors and entrepreneurs adopting AI at scale. Edmund's own background is South Florida luxury real estate: the same relationship-driven, white-glove, detail-obsessed business you run. He speaks your language because it's his language. On this engagement Edmund holds strategy, the relationship, and advisory.

Eytan Benzeno — Partner & AI Engineer

Eytan is the technical force behind Bogen.ai's builds — custom apps, AI models, automations, and integrations. **Eytan builds; Edmund advises.** You saw the proof on June 3rd: the two of us sat down after our meeting and had ListingStory live and working that same night. With this partnership you get a dedicated senior AI engineer, not a queue ticket.

Our Approach

Everything we build wears your brand and feeds your database — you own the systems, the data, and the client relationships. We're not a software vendor and we're not an agency that bills by the hour. We're two operators who build the tools, then run them with you.

How We Compare

You have three other ways to solve this. Here's the honest read:

Keep stacking off-the-shelf SaaS (JotForm, a CRM, an email tool, an answering service)

Cheap per tool, but none of them talk to each other, none of them wear your brand, and none of them write a listing story in your voice. You become the integration layer — which means it still all runs through you. That's the exact ceiling we're removing.

Hire an operations / marketing person

\$60,000–\$90,000 a year fully loaded, months to recruit and ramp — and it quietly breaks your promise. "When you hire Carrie, you get Carrie" stops being true the moment a seller is really dealing with your assistant. Systems scale you without diluting you.

A custom dev shop or AI agency

A custom intake app alone runs \$25,000–\$60,000 to build, before anyone maintains it — and they hand you software and walk away. We've already built yours, we run it for you, and we know real estate. You're not buying code; you're buying a partner who ships.

Bogen.ai is built for the solo principal who needs to scale herself without hiring a team or becoming an IT department. The same two people write the strategy and do the build. You start small, you see it work, and you grow it on your terms.

Risk & Guarantee

30-Day Money-Back Start

Run ListingStory for 30 days. If it isn't the most useful tool in your listing process and you don't want to continue, we refund the build fee in full. You risk nothing to find out.

You Own Everything

Your brand, your data, your client relationships, and the systems we build for you remain yours. Seller data is treated as confidential. You're never locked into proprietary software you can't leave.

Earn-the-Next-Stage Discipline

You only advance to Stage 2 or Stage 3 when the prior stage has proven its value in your business. We'd rather grow this slowly and keep you forever than oversell it once.

Fair Housing & Compliance

Every AI-generated listing story is written to be Fair-Housing compliant, and you approve all copy before it's ever published. The AI drafts; you decide.

Next Steps

1. **Say go on Stage 1.** Reply to this proposal and we point ListingStory at your live listings, your email, and your Drive.
2. **Final brand & fields pass.** A short call to lock your exact intake questions and confirm the look. We adjust anything you want.
3. **Go live within days.** You start sending the form to real sellers. We're on call for tweaks.
4. **Stage 2 when you're ready.** Once ListingStory has earned it, we scope the voicemail operator, the database, and the newsletter engine — one at a time.

Case Study Partnership

When this works — and it will — we'd like to tell the story. With your written approval, Bogen.ai may reference you by name and document this engagement (a short video, post, or keynote case study) to show other top agents what's possible. You approve any metrics shared, and you can revoke named use at any time.

- ✓ You become the flagship example of the luxury-agent AI operating system
- ✓ All named use of "Carrie McCormick" remains subject to your written approval

Terms

This Proposal Supersedes

This agreement replaces and supersedes the prior proposal of May 30, 2026 in its entirety.

Ownership & License

ListingStory and all systems we build are Bogen.ai intellectual property, licensed to you on a perpetual, non-exclusive, royalty-free basis for your use while engaged. Your brand, your seller and client data, and your client relationships remain entirely yours.

Term

Stage 1 begins with a 3-month minimum, then continues month-to-month (30-day notice). The annual plan saves 10% and credits the build fee. Stage 2 scoping begins by Day 60.

Content Approval & Compliance

You and your brokerage review and approve all AI-generated listing copy before publication; published material remains subject to your brokerage's advertising, MLS, and Fair Housing requirements. Seller data is treated as confidential and deleted on request.
