

PROPOSAL · CONFIDENTIAL

AI INTEGRATION PROPOSAL FOR LUCKY IN LOVE

Prepared for Brad Singer, Founder & CEO · Singer Capital Investments
LLC · Miami, FL

Brad —

Thank you for the time at the Surf Club. Eytan and I left that dinner sharper than we arrived, which is the surest sign of a good conversation. Brenda — thank you for the introduction. The Elliman world is small, the Miami world smaller, and the apparel-family world smaller still; that the three intersected over one table tells me this is the right room.

What follows is our proposal to help Lucky In Love do what every fifteen-year-old, family-owned brand earns the right to do at this stage:

compound the work the team already does well, instead of working harder. The pitch is leverage, not transformation. You don't need rebuilding. You need amplification.

THE OPPORTUNITY

Lucky In Love is a credible operation. Shopify, Klaviyo, Loop Returns, Okendo, K-Swiss, Bethanie Mattek-Sands, Simone Jardim, distribution from Tennis Warehouse to DICK'S to Tennis-Point EU, and a wholesale network anchored in the country-club channel that you and your family have spent fifty years cultivating. None of that needs reinvention.

What it needs is the layer that turns institutional knowledge into operating leverage. From our conversation, four pain points were named, and we believe each one has an AI-shaped answer that pays for itself inside a quarter:

- **Back-end visibility** — efficiencies hiding in the CRM and email-blast workflow that the team can feel but can't see.
- **ERP tap-in** — a read-only window into sales and operations data, surfaced in one place, refreshed automatically.
- **Sales + operations dashboard** — the weekly view across wholesale, DTC, and inventory that you've been asking your team to build by hand.
- **Competitive intelligence + business re-planning** — an AI agent that watches the competitive set (L'Etoile, Tail, Sofibella, Selkirk apparel, EleVen) and surfaces signal, not noise.

The wholesale rep network is the hidden gem. No one in this category has equipped that channel with AI. We think that's where the deepest unlock lives — but we won't pitch it before we've earned the right to. That's what the first thirty days are for.

BEFORE & AFTER

TODAY

- Klaviyo broadcasts to a list that wasn't really segmented
- Sell-through and inventory live in spreadsheets and instinct
- Reps work the account list by familiarity, not by opportunity
- Competitive scans happen when someone remembers to look
- Brad personally remembers every conversation; the team can't

AFTER 90 DAYS

- Email content personalized by sport, age tier, and last collection
- One dashboard, refreshed nightly, that Brad reads with coffee
- Every rep walks in with a 1-page AI-generated account brief
- Competitive intel arrives in a Monday-morning Slack digest
- The team operates with perfect memory at scale

OUR APPROACH

We do this in two paid phases plus an optional retainer. Phase 1 is short, fixed, and refundable — designed so you can try us before committing. Phase 2 is scoped after Phase 1, not before, because honest pricing requires honest discovery.

Scoping Engagement

\$5,000 · Fixed Fee · Money-Back Guarantee

A focused 30-day audit of Lucky In Love's systems, data, and AI readiness. Eytan and I work directly with your team. At the end of the month you receive:

- **Data & Systems Audit Memo** — current state of Shopify, Klaviyo, the ERP, Loop, Okendo, and analytics. Honest red-yellow-green on data quality.
- **Top-5 AI Opportunity Map** — ranked against the pains named above, each sized in dollars and effort.
- **Phase 2 Statement of Work** — a complete scope with a fixed price between \$45,000 and \$90,000, based on what we actually find, not what we hope.
- **Risk & Readiness Scorecard** — a one-page honest read on what would have to be true for Phase 2 to succeed.
- **30-minute live readout** with Brad, Brenda, and any team members you'd like in the room.

MONEY-BACK GUARANTEE

If at the end of the thirty days you are not satisfied with how Bogen.ai has worked with your team, you tell us in writing within seven days and we refund the full \$5,000. No fight, no fine print, no questions about the deliverables. You keep the audit materials for internal reference. We part as friends. The \$5,000 is also credited against Phase 2 if you decide to proceed.

Implementation Sprint

\$45,000 – \$90,000 · Tiered Scope · Locked at Day 30

Phase 2 is a real engagement with real money and a real outcome. The exact scope and price are set by what Phase 1 reveals — not by what we guessed at dinner. Three illustrative tiers below show how the work scales with the systems we find. At the Phase 1 readout you choose the tier; if none of them fit your budget, you walk and owe nothing further.

The three tiers below are **illustrative**, not yet committed. The Phase 1 audit determines which tier matches Lucky In Love's actual systems and data. You see the locked scope and price before you sign anything.

FOCUSED

Tier 1

\$45,000

- ERP read-only tap-in
- Sales & operations dashboard
- One CRM / email workflow upgrade
- Brand-voice Claude Project foundation
- Weekly status + final delivery readout

RECOMMENDED

Tier 2 •

**Standard
\$67,500**

- Everything in Tier 1
- Competitive intelligence agent (Monday Slack digest)
- Klaviyo AI-personalization layer (segments + send-time + content)
- Brand-voice Claude Project — full deployment
- Mid-sprint Day 45 review with the team

COMPREHENSIVE

Tier 3

\$90,000

- Everything in Tier 2
- Full email + SMS lifecycle rebuild
- One expansion module: AI sales-rep enablement **or** DTC virtual stylist
- Executive AI-literacy session for Brad + leadership
- Quarterly business-review template for Year 2

OPTIONAL • POST-SPRINT

Fractional AI Retainer

\$15,000 / month • 6-month minimum

After the 90-day sprint, the systems we build need someone who runs them, tunes them every month, and ships the next module from the opportunity map. The retainer buys Edmund as fractional AI strategist and Eytan as fractional AI/engineering lead — ongoing oversight, weekly office hours, monthly KPI reviews, and the runway to compound gains instead of letting them decay.

Engaged separately at the end of Phase 2. Not required.

INVESTMENT SUMMARY

PRICING AT A GLANCE

ENGAGEMENT	TERM	INVESTMENT
Phase 1 — Scoping Engagement	30 days · fixed fee · refundable	\$5,000
Phase 2 — Implementation Sprint	90 days · tiered & locked at Day 30	\$45,000 – \$90,000
Tier 3 — Fractional AI Retainer (optional)	\$15K / month · 6-mo min	\$90,000 / 6 mo

Phase 1 fee credited toward Phase 2 if you proceed. Phase 2 invoiced in three milestones (40% on signing, 30% at Day 45, 30% on final delivery). Out-of-pocket third-party costs (API spend, software subscriptions) billed at cost with invoice copies attached.

WHY BOGEN.AI

Edmund Bogen — Founder of Bogen.ai. AI consultant, keynote speaker, and author of *Prompt to Close: The AI Playbook for Real Estate Professionals* (Amazon, 2025). Founder of Edmund's Mastermind, an AI community of 14,000+ professionals with roughly 200 active paid coaching members. Featured this month in Douglas Elliman Insider — Brenda will recognize the byline. South Florida operator who understands the affluent female buyer and the country-club channel intimately; the playbook transfers from luxury real estate to luxury apparel without losing a beat.

Eytan Benzeno — Co-founder of Bogen.ai, technical lead. AI engineer, automation specialist, and the person who actually ships the build.

Speaks both tech and business; treats client data the way good lawyers treat privileged information.

Together we are a deliberately small team — two founders, no junior hands-off, no offshore relay. You get senior attention from contract to delivery. That is the trade-off: we cost less than a Big-4 firm, and we cost more than a freelancer, and we are exactly the right size for a brand of Lucky In Love's stage.

RISK, TERMS, & WHAT PROTECTS YOU

- **Phase 1 money-back guarantee** — full refund within 7 days of the Day-30 readout, by written notice. No defense required.
- **Phase 2 day-30 kill switch** — if the scoped Phase 2 number doesn't fit your budget at the readout, you walk. Phase 1 stays paid (or refunded); no Phase 2 fees owed.
- **Milestone-based Phase 2 payments** — 40 / 30 / 30 so you are never overexposed.
- **30-day termination for convenience** on Phase 2 — either side can end the engagement; fees pro-rated to work delivered.
- **Data handling** — Lucky In Love owns its data and the final deliverables. Bogen.ai retains the underlying methodology. No Lucky In Love data trains any AI model. Deletion certified within 30 days of termination.
- **AI output review** — every AI-generated draft (copy, recommendations, dashboards) is reviewed by your team before commercial use. Bogen.ai builds the tooling; Lucky In Love sets the guardrails.
- **Insurance** — Bogen.ai carries Tech E&O and Cyber Liability coverage. Certificate available on request.
- **Confidentiality & case study** — mutual NDA; with your written approval, Bogen.ai may reference the engagement and high-level outcomes in marketing. Account-level data, customer PII, supplier identities, and unreleased designs stay confidential.

NEXT STEPS

If this proposal lands the way we hope, the next move is short:

- **1.** Reply with "Let's start" and a preferred kickoff date in the next two weeks.
- **2.** We send a short Phase 1 letter of engagement, invoice for \$5,000, and a 30-minute kickoff call to set access to Shopify, Klaviyo, and the ERP.
- **3.** Thirty days later, you have the audit, the opportunity map, and a scoped Phase 2 number — and a real decision to make.

If you have questions before then, the easiest channel is email:

edmund@bogen.ai. Eytan can be reached at eytan@bogen.ai for any technical clarifications.

Thank you again for the dinner, Brad. And Brenda — thank you for the introduction. We don't take warm rooms for granted.
